

# Upholstery Options

## Natursoft™ Upholstery

Natursoft feels soft to the touch...a luxurious silky-smooth feel similar to fine glove leather. We've tested Natursoft's durability with extensive rub tests, including several of the most popular oil and cream products used in today's spas. The results were phenomenal...a long lasting, easy to clean upholstery that is so soft, you have to feel it to believe it! And most importantly, Natursoft is an environmentally friendly polyurethane fabric with biodegradable rayon backing.
