

AquaScape Dry Hydrotherapy System

Pevonia Equipment positions itself once again as a true visionary and leader in the spa/salon equipment industry by blazing new trails with the latest revolution in hydrotherapy...AquaScape Dry Hydrotherapy System.

Offer clients the benefits of a de-stressing hydrotherapy treatment escape without removing their clothes or coming into contact with water. This pioneering technology utilizes the absence of gravity within a full body water massage to relax the mind while vanquishing tension and stress. Soothing chromotherapy further aids to alleviate mental fatigue.

Clients enjoy a deep state of gravity-free relaxation as their entire body gently floats on a soft, flowing cloud of water at a regulated soothing temperature. European studies show that an AquaScape 20-minute treatment is equivalent to a full night of sleep. Also ideal for body wraps and massage treatments.

***The latest innovation
in dry hydrotherapy!***

Zen Model
Item # 9334

- High quality wood & waterproof material
- Soothing chromotherapy technology
- Conveniently sized (standard massage bed)
- Cost-efficient – low voltage, bi-annual water drainage
- Multi-purpose (dry, body wrap, massage)
- Minimum treatment downtime
